

Examiners required for Financial Capability qualifications

The London Institute of Banking & Finance, a dynamic not-for-profit education provider with taught degree awarding powers, is seeking examiners for its Financial Capability qualifications.

We would welcome interest from those keen to become an examiner at Level 2 and Level 3. Ideally, you will have a further education background either as an academic, or as an industry practitioner with appropriate teaching or academic qualifications. To become an examiner, you will be educated to GCSE level or equivalent and have a minimum of 3 years experience either teaching a similar Level 2 or Level 3 qualification (eg mathematics, economics or business studies) or you will have 3 years industry experience.

If you are interested in examining for us, please send your CV, with a covering letter outlining relevant experience and areas of writing interest, by email to: fcexaminers@libf.ac.uk.

The table below outlines the qualifications currently being recruited for by The London Institute of Banking & Finance.

Qualification	Subject expertise	Areas for recruitment
<p>CeFS – QCF Level 3 Designed to provide students with a challenging qualification covering the core disciplines of financial capability, enabling them to examine issues relating to financial capability, apply specialised, current knowledge of financial capability and finance concepts and theories.</p>	<p>Practical and professional experience of being able to analyse financial data and information, products and services and be able to reflect on their effectiveness and understand how financial products respond to the drivers and implications of changes in the wider environment and how these changes affect financial decision-making.</p>	<p>Examiners for the written part of the assessment methodology (case study based).</p>
<p>DipFS – QCF Level 3 Designed to provide learners with a challenging qualification covering the core disciplines of financial capability and financial sustainability as they impact on the individual, financial services sector and the government.</p>	<p>Practical and professional experience of using appropriate tools (software and IT) and methods and conduct research through the creation, extraction and analysis of data and information from financial sources; ability to analyse financial services products, financial sustainability and ethics and how financial products respond to drivers and implications of changes in the wider environment.</p>	<p>Examiners for the written part of the assessment methodology (case study based).</p>
<p>CeFE – QCF Level 2 Designed to prepare students to become responsible citizens by providing them with the skills and knowledge to manage their money well and make sound financial decisions. It also provides an understanding of the wider realm of public finance and the economy.</p>	<p>Practical and professional experience of being able to use appropriate tools to manage a personal budget; understanding the concept of financial planning, entrepreneurship and its impact on business and society, and being able to calculate the costs of borrowing and spending.</p>	<p>Examiners for the written part of the assessment methodology (case study based).</p>
